

# Whitepaper

**The Leading DeFi on Binance Smart Chain  
Upto 10% daily return and 15% referral  
bonus Fully Verified and Audited Contract**

**SPAC Miner**  
*YOUR BNB MINER*

## What is the price of SPAC Miner?

SPAC Miner do not have a set price. Higher TVL more Miners per BNB, Lower TVL less Miners. This creates level playing field so no user can be late. There is NO calculator available to work this out.

## What will my daily percentage be?

Daily percentage is up to 10% this depends on withdraw habits, the time of day you compound or deposit and TVL fluctuation. Average daily return is 7-10%

## Why are my rewards not growing?

Withdraw habits effect rewards, you withdraw too much your daily percentage drops. If you only started with a small deposit it will take time to display on the dApp. Only goes to 3 decimal places. TVL daily increase can cause lower daily percentage

## What happens if I always withdraw?

If you always withdraw your daily percentage will drop dramatically and will not receive the highest daily returns. This is the anti-whale mechanism that preventing a whale draining the TVL

## Is Compound more often better, 2 or 3 times a day?

Compound is the same as compounding. So essentially yes. You will need to pay standard BSC gas fees for every compound

## What are Miner?

Miner are the miners that are hired with BNB and work to get your rewards. This is just a term we decided to use. Crypto OGs will know 'Miner' as BNB

## Can I get my initial back?

SPAC Miner is a locked rewards pool, so no. You get your initial back over time through the my rewards section of the dApp

## What are the fees?

There is 5% marketing fee taken upon ALL deposits and withdraw from SPAC Miner. Standard BSC network gas fees are required for EVERY transaction made deposits, withdraws and compound! Common issue when compound is no gas fees!

## Do Miner amount decrease when you withdraw?

No, the 'Miner' amount will not change. If you make a new deposit or compound the amount will increase but not when you withdraw (take rewards). The 'Miner' are less efficient over time if you withdraw too much

## Is this sustainable?

Yes, as long as there is TVL in the contract then there will always be rewards. The hungry people who withdraw too much get punished and get lower and lower rewards. It will last a long time the higher the TVL is

## What is the best strategy?

We recommend the tried and tested method as in it is written in the contract. Compound 6 days and withdraw 1 day a week. It will compound your investment and receive your initial back in 3-5 weeks

## What prevents the devs from rug pull?

The contract is immutable and fully audited by Secure Eye. Therefore cannot be changed or altered in any way shape or form. It is audited and verified. You can view this on [bscscan.com](https://bscscan.com) and the audit it is found on the website

## The 6/1 Strategy explained?

It is 6 days not 6 compounds. In those 6 days yes you can compound as many times desired. It is just compounding faster.

## Is it too late to invest?

No, the contract is written to provide an optimal entry for any and all users, new or old. This is the reason the Miner per BNB amount changes frequently with TVL fluctuation to provide an even playing field for any new user coming to SPAC Miner and not giving the first user/s a head start

## Can contract functions be added?

No, the contract is immutable and cannot be changed. The contract works perfectly well as it is. No wallets can be blacklisted, no forcing people to compound 6 days and withdraw 1 day a week. Nothing can be changed

## Does it have an anti-whale mechanism?

The contract has an in-built anti-whale mechanism. This works as follows; User 1 compound 6:1 gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who withdraw continually rewards will drop to 0.5% per 24 hour period. This is to prevent 1 user draining the TVL, creating sustainability

## What is the minimum deposit?

No minimum deposit requirements. If there are rewards in the "My Rewards" section and you make a new deposit both the new deposit and rewards are transferred into Miners

## What is minimum compound?

There is no minimum compound requirements. You will always be charged standard BSC BEP20 gas fees for every interaction with the contract

## What's the roadmap long term?

SPAC Miner aims to become the largest Dapp on Finance Smart Chain. SPAC Miner will integrate with large swaps such as Pancakeswap in the near future. SPAC Miner will have a plan for releasing SPAC token and airdrop to all early investors of SPAC Miner.

## DISCLAIMER

We DO NOT guarantee 10% a day it is up to 10%. SPAC Miner is illegal in certain countries please consider this when investing. Do not invest more than you can afford to lose

# THANK YOU
